USER MANUAL

Demetillo, Josefa Katrina E.

BSIT - 3A

ABOUT TRAVIA

Travia is a mobile application designed for travelers. It is a travel community app where people can find trending spots nearby as well as share their own adventures with other people. Travia makes it easy for people to document their adventures with its features like posting pictures, videos, and itineraries. The app also includes a message feature, allowing people to find their travel mates.

KEY FEATURES

- User profiles
- Social sharing
- Community Engagement
- Community map
- Messaging
- Search & Explore

DEVICE REQUIREMENTS

- Available for Android phones running Android 5.0 and above.
- Before installing the app, make sure that your device has at least 70 MB of storage with 4GB of RAM.
- The device should be connected to the internet when using the application.
- Device must enable their location for better location tracking.

CONTENT OF THE USER MANUAL

- Application installation
- Account creation
- Content sharing
- Creating an itinerary
- Community engagement
- Messaging features
- Destination search

INSTALLATION AND SET UP

INSTALLATION

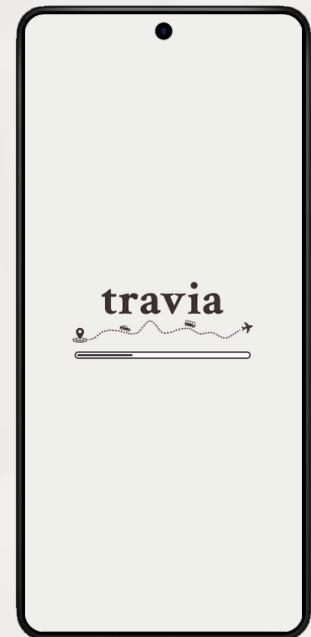

Install the application

After installation, the application is ready to run.

SET UP

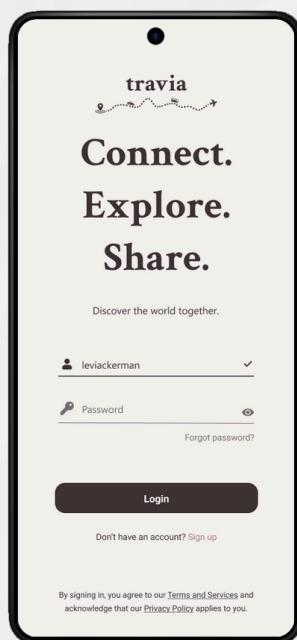

Step 1:

Once the application is open, a 5 to 10-second welcome screen will appear.

Step 2:

After the welcome screen, the **login page** will be displayed. If the user wishes to enter the application, they will need to input their username and password.

2.1 If the user has an account but does not remember his password, he can change it by tapping the **forgot password button** under the password input box. The page for forgetting the password will be displayed.

User will **input the email address** they used when they created their account.

If the system verifies the existence of their email address, they will be directed to the **page for changing the password**

The diagram shows two smartphone screens. The left screen displays a 'Forgot Password' page with a text input field labeled 'Email Address' and a 'Verify' button at the bottom. A callout arrow points from the text 'User will input the email address they used when they created their account.' to the 'Email Address' field. The right screen shows a 'Change Password' page with two input fields: 'New Password' and 'Confirm New Password', both with visibility toggle icons. A callout arrow points from the text 'The user will be directed to the login page again after changing their password.' to the 'Change Password' button.

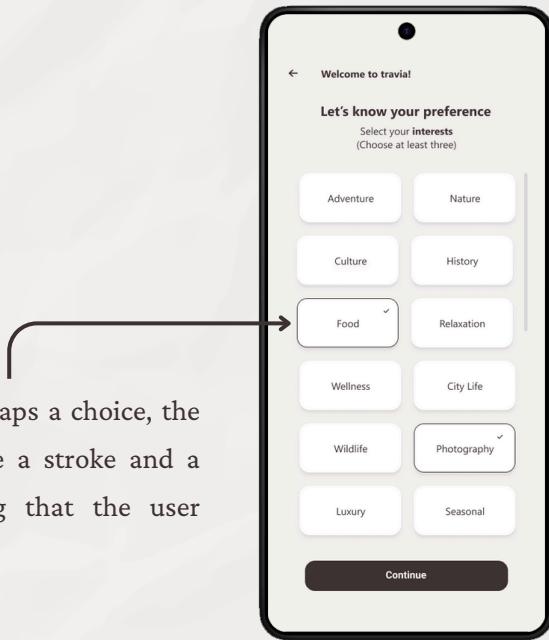

The user will be directed to the login page again after changing their password.

2.2 If the user does not have an account, they can easily create one by filling up the signup page.

The diagram shows two smartphone screens. The left screen displays a 'Sign up' page with fields for 'First name', 'Last name (optional)', 'Birth of Date' (with a date picker icon), 'Country' (with a dropdown menu), and 'City / Municipality' (with a dropdown menu). A 'Next' button is at the bottom. The right screen shows a continuation of the 'Sign up' process with fields for 'Email Address', 'Username', 'New Password', and 'Confirm New Password'. A 'Sign up' button is at the bottom. Both screens include a note at the bottom: 'By signing up, you agree to our Terms and Services and acknowledge that our Privacy Policy applies to you.'

2.3 After signing up, the user will choose his interest to filter his feed based on the user's preference. This will filter out the content of the feed based on the preference of the user.

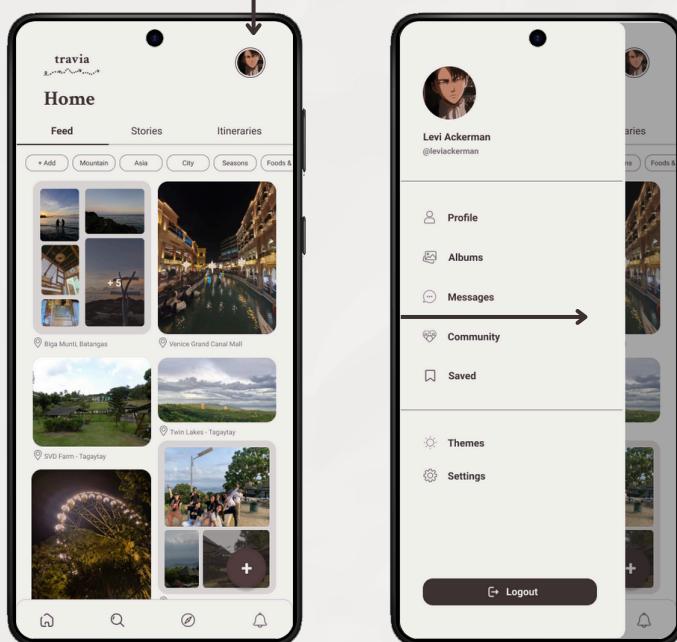

When the user taps a choice, the option will have a stroke and a check indicating that the user taps the option.

Homepage

Step 3:

Homepage is for social engagement – posting, liking, and commenting.

3.1 After logging in or signing up, the user will be able to enter the app, and he will be directed to his feed.

3.2 When the user swipes the screen from the left to the right side of the screen, the sidebar will show up. The sidebar contains the user's profile picture, name, username, and the buttons profile, albums, messages, community, themes, settings, and the logout button.

travia

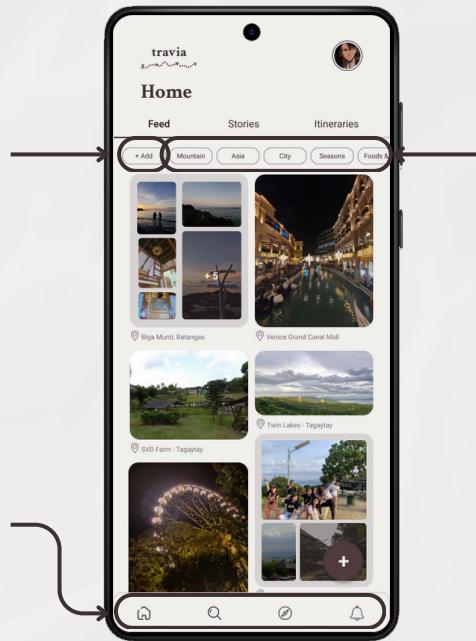

Step 4:

Three sections divide the homepage – the feed, stories, and itineraries.

This button adds another item to filter out the contents on your homepage

Tapping options in this section will allow the user to filter the content of his feed (this is based on the preference he selected from the beginning).

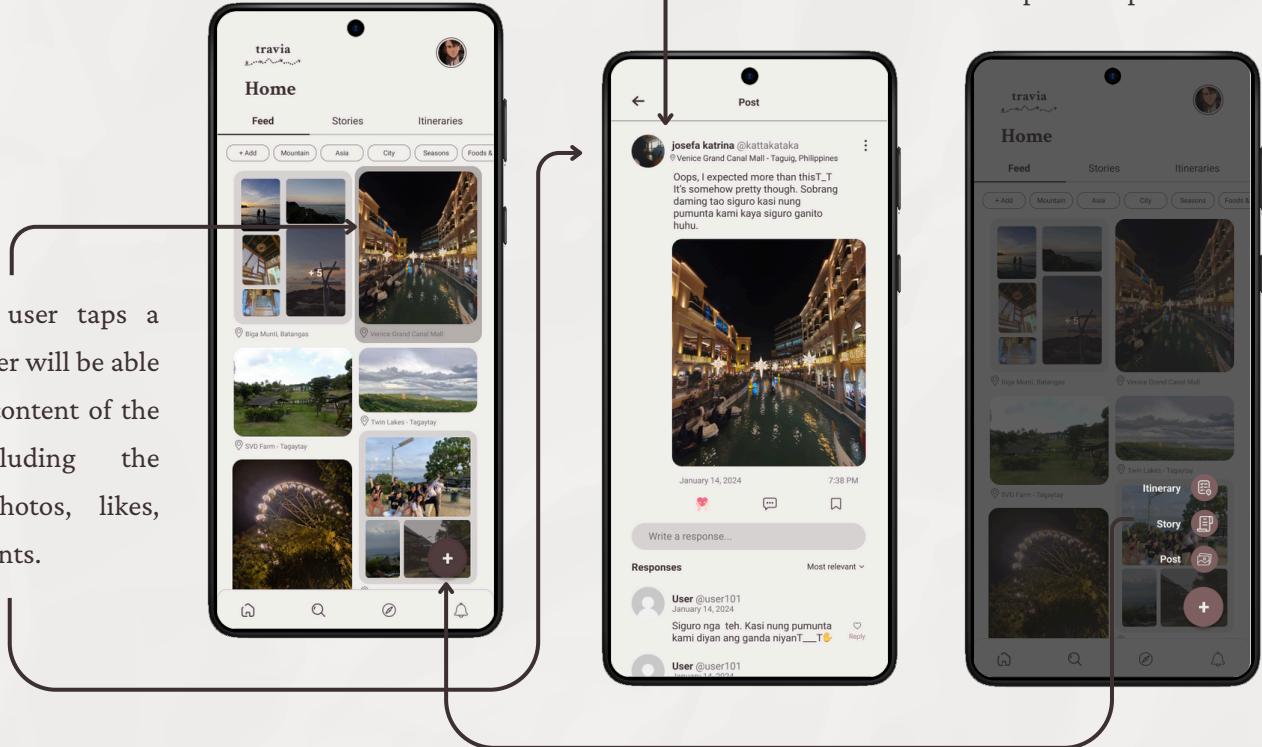

The **bottom tab layout** typically includes quick-access navigation buttons – home, search, explore, and notifications.

4.1 In the **feed section**, the user will see the photos posted in the app, either from his friends or from other people. The location is also displayed below the posts.

Tapping other users' profile pictures or usernames will direct the user to that person's profile.

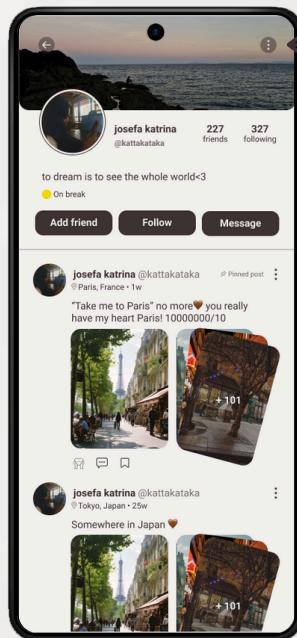

When the user taps a post, the user will be able to see the content of the post, including the caption, photos, likes, and comments.

Tapping this button will give the user the options to choose what to post – photos, stories, and itineraries.

When the user views someone's account, they can see their posts, add or follow them, or send them a message.

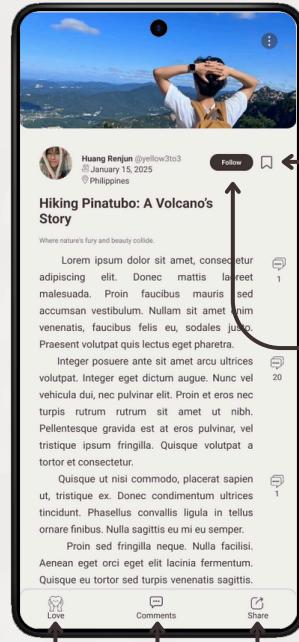

Tapping this **3 dots button** will give the user the **option to block or report** the viewed account.

4.2 In the stories section, the user will be able to read or post longer text stories than in the feed section. This section is for content with longer text such as stories.

When the user taps a story, the user will be directed to the page where he can read the whole story.

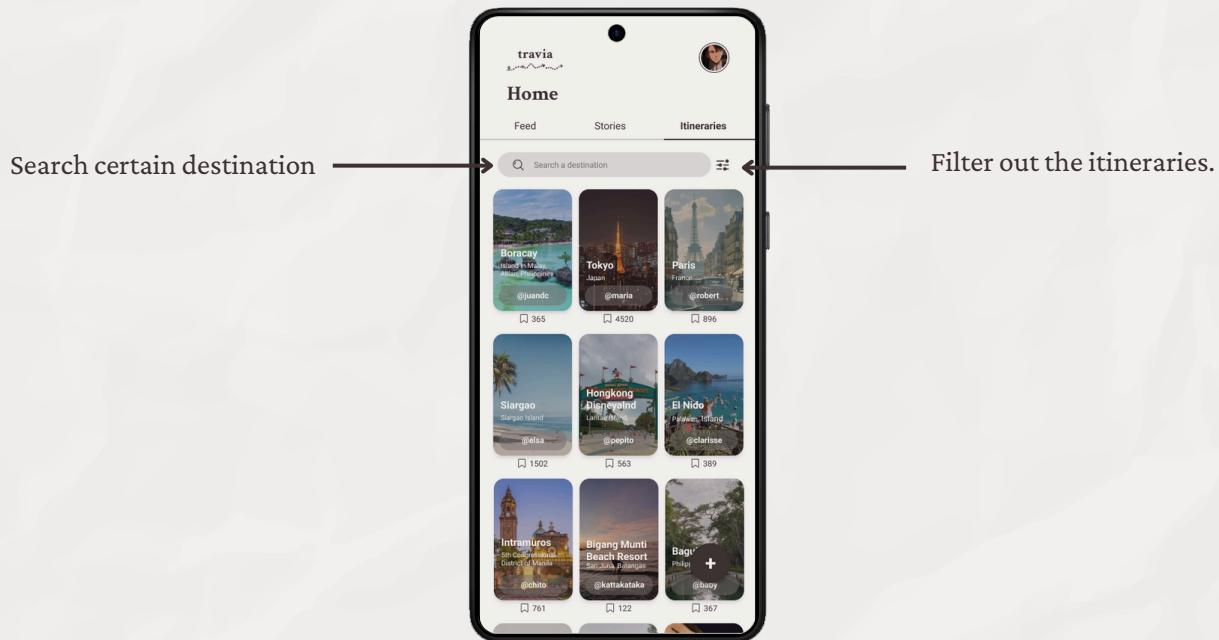

Like button Share the story
Read or add comment/s button

Tapping this will save the story in the user's saved section

Tapping make the user to follow the author of the story.

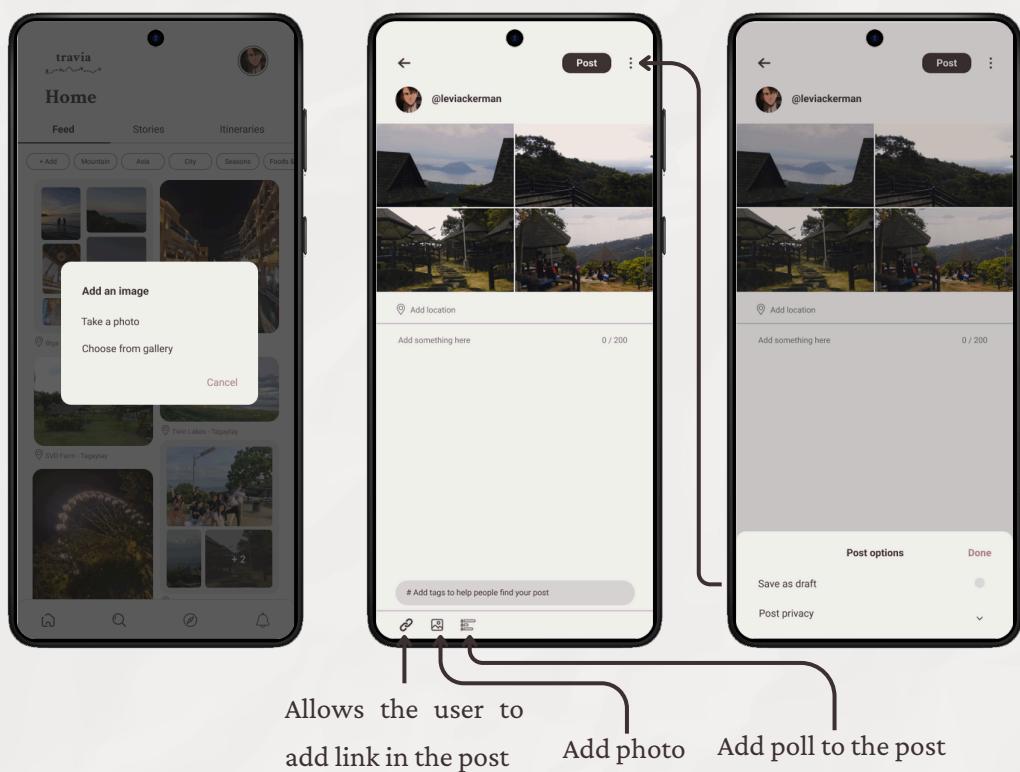

4.2 In the **itineraries section**, the user will be able to post or find itineraries for their trips, including destinations, activities, accommodations, and travel tips shared by the community.

Step 5:

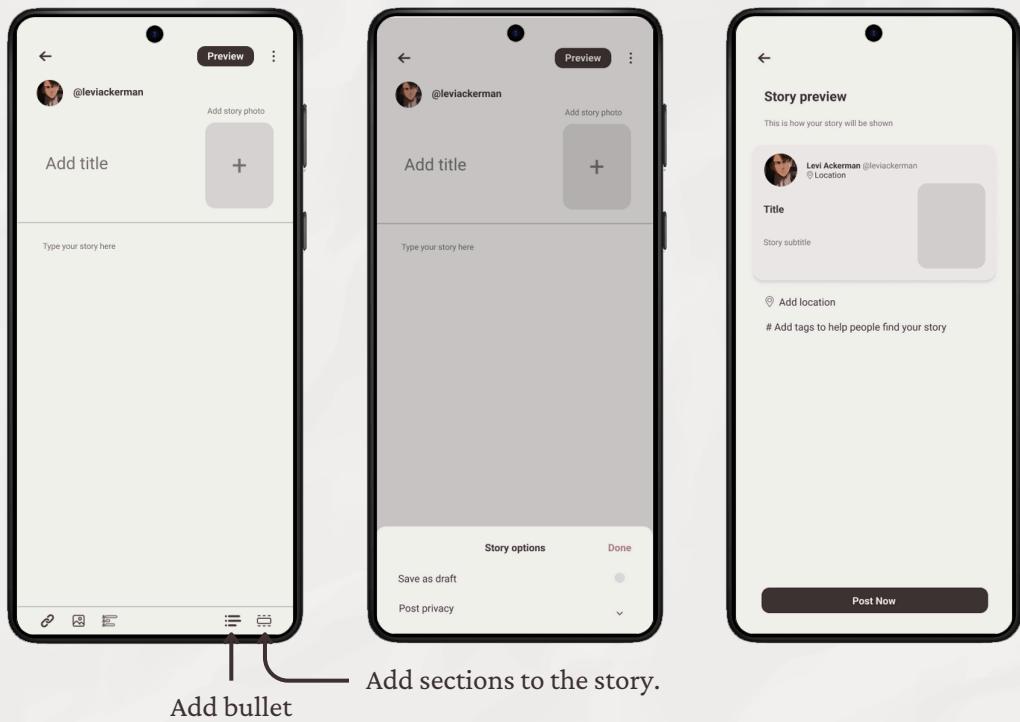

Posting in the feed, a story, and creating an itinerary.

5.1. Posting in the feed requires at least one photo. Therefore, choosing to post in the feed will first ask you to choose a photo.

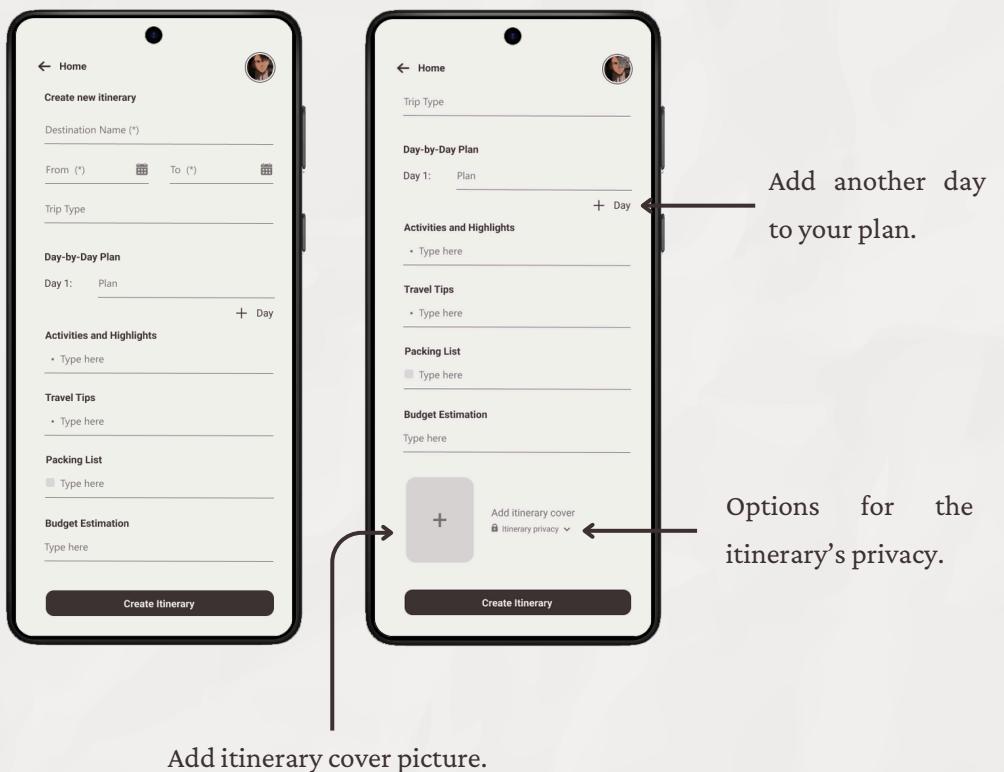

5.2. Posting a story requires the user to put a title and a story cover.

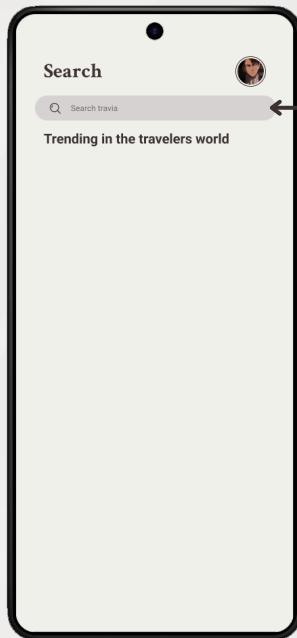

5.3. Creating an itinerary.

Step 6:

SEARCH

Search anything in the app.

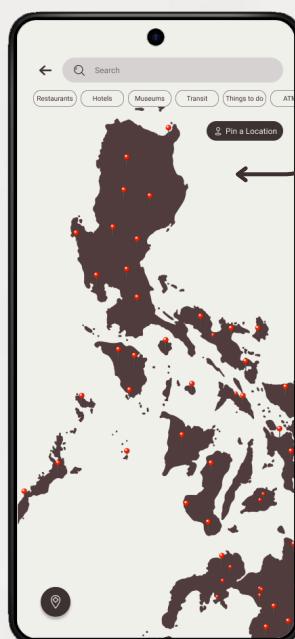

Step 6:

EXPLORE

Find spots and places near the user's location or the most visited places in the current country. The users can also pin locations and share it publicly for other people to see it.

Search a location

The user can pinch the map in and out to zoom and view specific locations.

Community map. When the user click the map, it will show the locations pinned by other users.

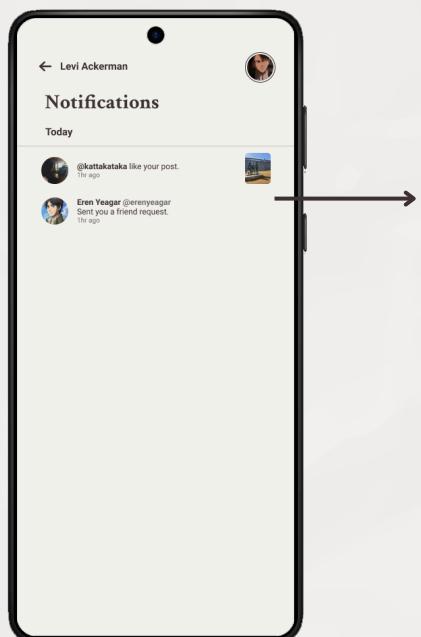

6.1 The users can tap the locations. Tapping the locations will show the locations' descriptions and reviews. Save button to save the destination.

Step 7:

NOTIFICATIONS

keeps users informed about updates, interactions, and important alerts related to their travel activities.

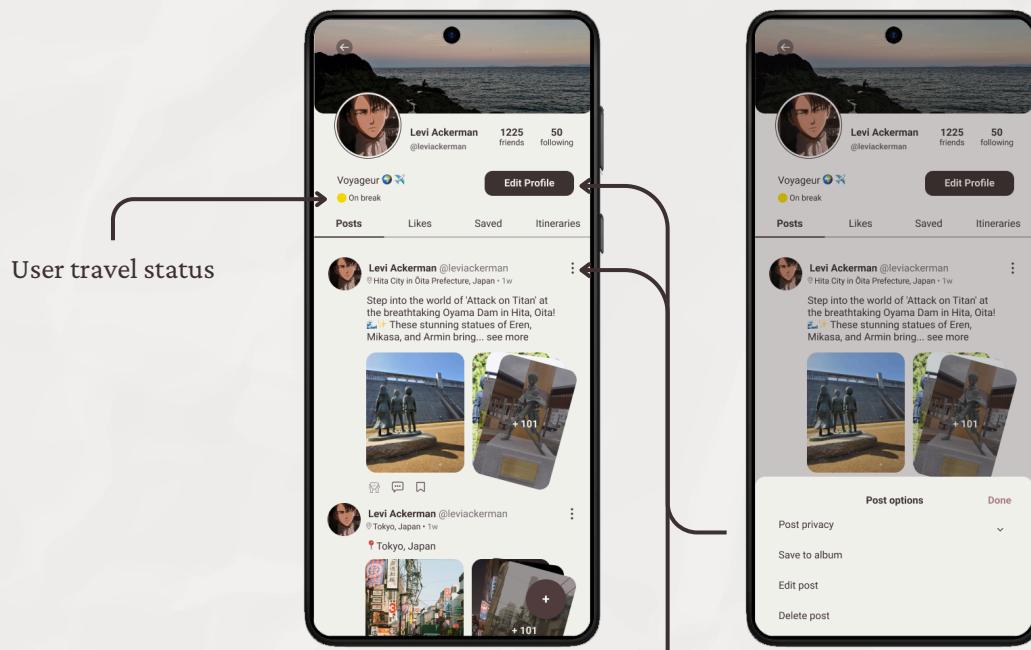

Tapping a notification will direct the user to the relevant section of the app.

Step 7:

PROFILE

The profile shows the account of the user.

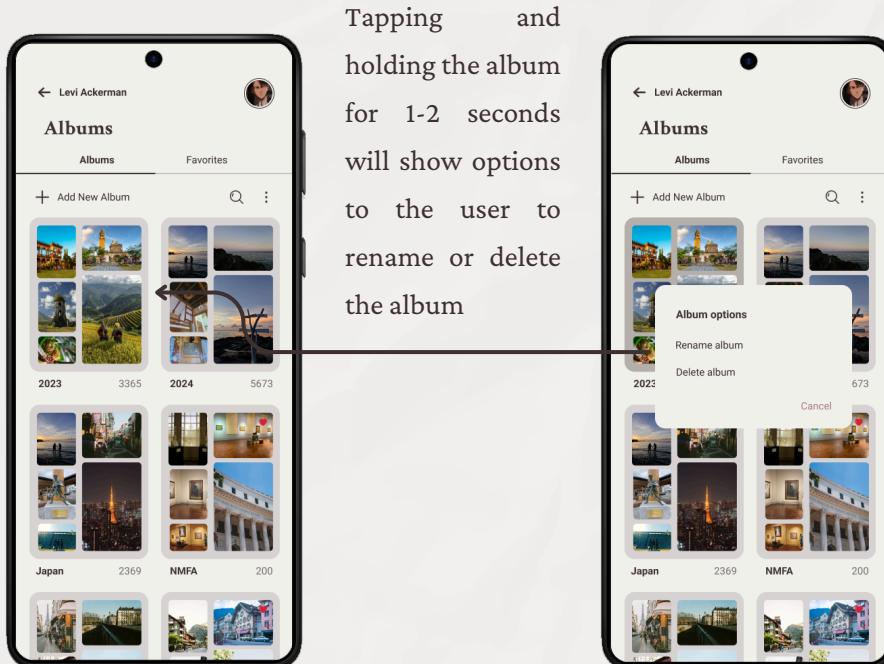

Edit button - allows the user to edit their account information.

Step 8:

ALBUMS

The albums allows the user to save the photos the user posted to an album to make it easier for the user to find his photos. It also allows the user to organize his posted pictures.

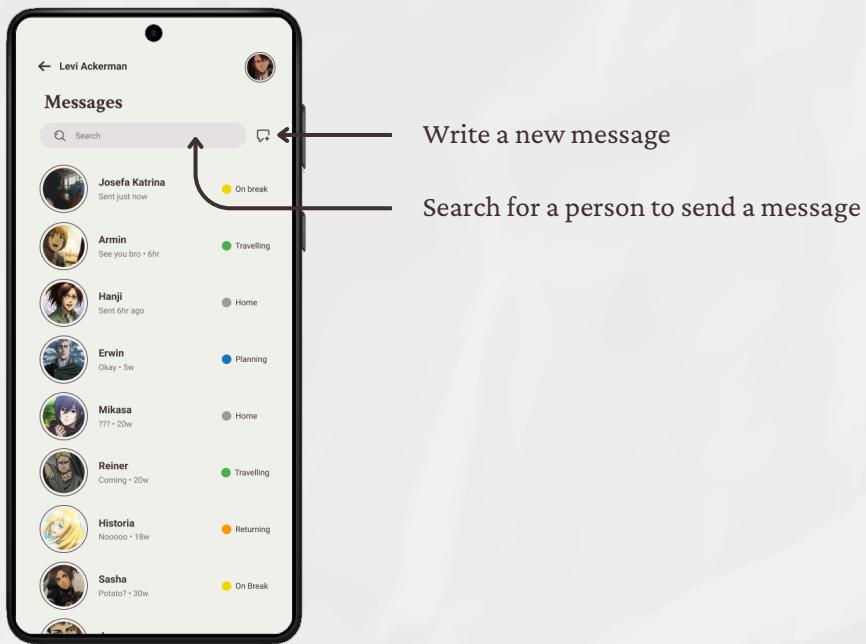

Step 9:

MESSAGES

This section allows the user to send and receive a message.

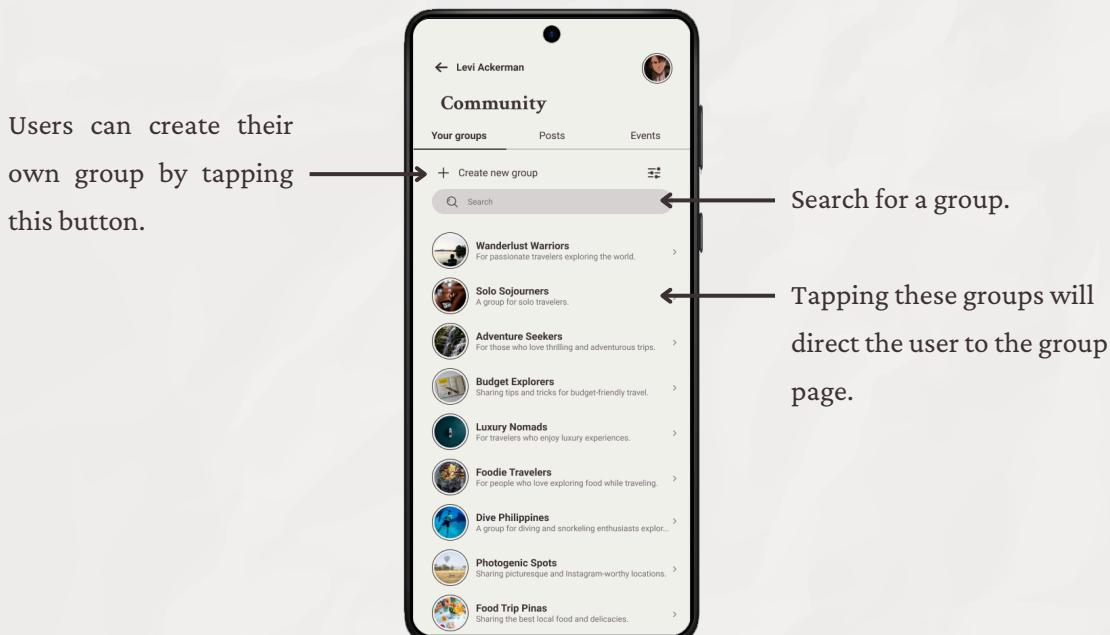

Step 10:

COMMUNITY

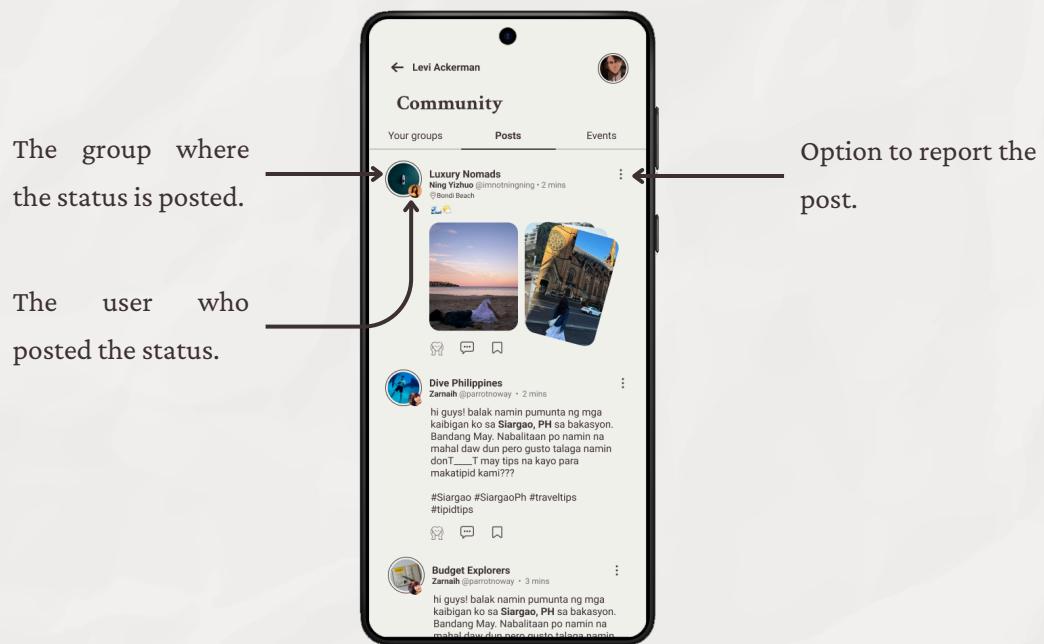

In the community, section is where the user can interact with other people with the same interest. The community section is divided into 3 sections.

10.1 The ‘Your Groups’ section displays the groups the user is a member of, allowing easy access to discussions, posts, and updates within each group.

10.2 The ‘Posts’ section displays posts from people across different groups, allowing users to view and engage with content from various communities.

10.3 The ‘Events’ section shows events created by the groups. Users can view these events, mark their interest, and set reminders.
